Github Projects

/kordeviant/react-atomic-state ⭐ :3
Proof of concept recoil style state management for react, under 100 lines of code small surface area for zero performance penalties.

/kordeviant/mat-datepicker-module-persian ⭐ :95
Probably often used material datepicker for angular version-2 era, when it didn't have any persian support.

Skills

kubernetes helm
gitOps fluxCI ci/cd
linux shell docker
gitlab azuredevops
mikrok8s k0s

devsecops argoCD
mikrotik NginxIngress
TraefikIngress
Backups monitoring
graphana prometheus

Abilities

Passionate DevOps Practitioner with Personal 3node Kubernetes Lab. Utilize GitOps to manage infrastructure and deploy dev/prod environments from a single repository Gained disaster recovery expertise through intentional deletions and quick restorations Implement data backup sidecars using rclone to safeguard services' data on Google Cloud storage. Demonstrate expertise in router configuration, VPN setup, and Linux shell scripting Utilize vulnerability scanning tools to maintain the security of Kubernetes cluster configurations.

Official Jobs / Experience

- **2024 gssint.com** GSS INTERNATIONAL
migrating infrastructure of 100 vms and two datacenters to kubernetes. setting up two datacenter kubernetes clusters. handling all clusters and kubernetes infra plus multi team deployments usin flux ci and multiple git repositories. gitops at its best. deploying databases and workflow engines using helm

- **2023 armanx.trade** Trading Platform
setting up gitlab ci on kubernetes, managing gitlab ci deployments for diffrent environments and datacenters. using gitlab ci cache to reduce build time.

- **2022 snapp.express** Multi-vendor Grocery Shopping
optimizing gitlab ci build time, using vercel deployments to have multiple releases for testing befor production

- **2021 armanx.trade** Trading Platform
setting up gitlab ci on kubernetes

- ~~**2020 infodeniz.com** Dynamic Content Platform no related devops tasks~~

- **2019 sepehrpay** ERP for online Banking/Payment using azure devops on premise for ci/cd also using that for tasks and scrum in our team.

- **2018 sepehrpay.com(PWA)** Client Super App for all kinds of payment finance
setting up azure devops on premise on vm infra with multi build agents machines for a large team with multiple projects and lots of build processes going on

- ~~**2017 storm-online.ir** Online Accounting Platform no related devops tasks~~

- ~~**2016 capten.ir** Online Flight/Travel Aggregator no related devops tasks~~

- **2015 flawingo.com** Online Flight/Travel Aggregator setting up azure devops on vm infra for ci/cd

Education

- **1999-2006 SAMPAD-NODET**(National Organization for Development of Exceptional Talents)**: Diploma in Mathematics**
Mathematics and basic computer science, logic and algorithm, logical circuits and object-oriented programming.
