Github Projects

/kordeviant/react-atomic-state ⭐ :3
Proof of concept recoil style state management for react, under 100 lines of code small surface area for zero performance penalties.

/kordeviant/mat-datepicker-module-persian ⭐ :95
Probabely often used material datepicker for angular version-2 era, when it didn't have any persian support.

Skills

JavaScript React-Vue- Qwik NextJS SSR TailwindCSS flex cssGrid ThreeJS ViewTransition cssAnimationTimeline Redux Recoil

ReactQuery XState SocketCluster FigmaToReact WebToFigma PWA Functional ReactiveX(RxJS)

Abilities

I'm highly adept at quickly integrating into any React or Vue project, adeptly handling code of varying quality, and delivering polished results. My skills include creating pixel-perfect UIs from Figma designs and crafting stunning landing pages with 3D and scroll animations, as well as app-like behaviors using view transition animations. I prioritize writing performance-optimized code, free from memory leaks. I can enhance your code by identifying and fixing memory leaks, and I'm also available for code review support. Leveraging static CMS/JAMstack, I specialize in setting up dynamic websites efficiently, without the need for extensive infrastructure, and at no cost.

Official Jobs / Experience

- **2023 armanx.trade** Trading Platform performace optimization - trading view charts customizations

- **2022 snapp.express** Multi-vendor Grocery Shopping Cleaning up a bloated redux react web app - migrating it to react query - using sentry + code reviews and lots of testings for a high user based working app

- **2021 armanx.trade** Trading Platform Trading Platform - React - MUI - Mono Repo Turborepo - realtime websocket data subscriptions

- **2020 infodeniz.com** Dynamic Content Platform VueJS Nuxt MaterialUI ckeditor plus custom features

- **2019 sepehrpay** ERP for online Banking/Payment React MaterialUI-5 PWA indoor ERP and Payment Provider Management System route controled data tables with filtering on any column and 9 data types

- **2018 sepehrpay.com(PWA)** Client Super App for all kinds of payment finance React MaterialUI PWA staff management and fleet coordination openstreetmap area selection query with postgresql postgis to see if point in boundry

- **2017 storm-online.ir** Online Accounting Platform angularjs bootstrap online accounting system

- **2016 capten.ir** Online Flight/Travel Aggregator angular 7 materialui flight booking system

- **2015 flawingo.com** Online Flight/Travel Aggregator angular 7 materialui flight booking system RxJS both for autocompletes and backend streaming response from many providers as they complete or retried

Education

- **1999-2006 SAMPAD-NODET**(National Organization for Development of Exceptional Talents)**: Diploma in Mathematics**
Mathematics and basic computer science, logic and algorithm, logical circuits and object-oriented programming.

- **2006-2012 University of Tehran: Bachelor of Architecture Engineering**
Architecture is combining art and math to be used by humans for specific purposes, just like UX, and my understanding of UI-UX comes from my architecture background.

- **2013-2016 University of Semnan: Masters of Construction Management**
management - work breakdown structure - cost analysis - accounting - human skills

Attitude / Soft Skills

Its an infinite game and humor is required to survive.

Farewell

You can google libgen or scihub url, and read any book you like, but please buy them if you can.
